SMART CONTROLLER

Fully Automatic Digital Motor Starters

All in one Controller

UNIQUE FEATURES

- ✓ R.Y.B Ampere Meter, R.Y.B Volt Meter
- ✓ High Voltage Protection
- ✓ Low Voltage Protection
- ✓ Overload Protection
- ✓ AC Contactor operated Fast Switching
- ✓ Phase Failure Protection
- ✓ Reverse Phase Protection
- ✓ Adjustable Overload Setting
- ✓ Soft Start/Stop Buttons
- ✓ One million Operation mechanical life
- ✓ Adjustable Auto Start and Bypass Function
- ✓ Automatic/Manual Operation
- ✓ Noise & Vibration Free Operation
- ✓ Low Maintenance on Mechanical Equipment
- ✓ Designed to Operate -20 °C to 65 °C Temperature
- ✓ Simple Construction and wiring

Over 50 Years of Unmatched Quality Products

The beginning of the new era

STAR DELTA Motor Control & Protection Unit

- High and low voltage protection
- Overload and dry run protection
- Cyclic timer, on and off delay timer
- Two separate display to see volt and amp.
- Auto switch provided
- Easy to program Voltage Ue 415V, Frequency 50Hz, Current 0-50A, Coil Voltage 20-30V, DC Microcontroller Based Technology, Dry Run, Inbuilt hour based and Real time clock based timers with time compensation feature with Line Voltage, Phase current.

SMART-ON The digital based advanced technology motor protection device incorporating all latest features. Innovated & designed specially to meet today's digitalization control of motors & pumps.

SMART-ON Digital Panel consists of micro processor based control unit which enhances the performance of the device in terms of functionally & technically. The smart-on series consists of all type of models suitable for single phase & three phase operations.

SMART-ON Series involves stringent manufacturing process and quality checks at all stages of material right from incoming to final dispatch. Advanced, latest modern machines and equipments are used to manufacture and assemble digital control panels.
